We posted a link to the first astf DVD review on Saturday, and more will likely show up throughout this week. Today's crop:

- DVD.IGN.com
- DVDTalk.com
- EyeCraveDVD
- ComingSoon.net

All reviews are very positive about the visual and audio quality of the video transfer, and give us more details about the extras on the second disc, including the featurettes, deleted and alternate scenes (which are integrated into many of the featurettes), and easter eggs. If you went to BotCon 2007, get those pause and zoom buttons ready!
