Amazon.co.jp has updated its Transformers HenKei! order pages with a few images of upcoming figures. Among those to get pictures are Streak, Lambor and Octone, the HenKei! versions of Silverstreak, Sideswipe and Tankor! The most notable difference from the Hasbro versions is the use of HenKei's chrome on the guns and on Sideswipe's spoiler, but it also looks as the black will be replaced with dark gray on a couple of the figures. So HenKei! fans check out the images so you can compare them to the Universe toys!
