TFW2005 has received an image of the Canadian packaging for a Universe 5-pack of Deluxes entitled "Battle for the Cyber Planet Keys". It features the Cybertron version of Armada Supercon Optimus Prime in more G1 accurate colors, as well as reissues of Cybertron Runamuck, Longrack, Blurr and Buzzsaw. Is this the Sam's Club exclusive that was listed on Hasbro's Transformers checklist? It looks like it may just be!
