Tuesday, 16 September 2008

With their September 18th release just days away, TakaraTomy has updated their Transformers Henkei! website with new character pages for C-07 Sunstreaker and C-08 Prowl. Sunstreaker features chromed parts and a darker yellow from his Universe counterpart, while Prowl features a new lightbar and chromed parts compared to the Hasbro version. They've also updated the comic section with images from the comic included with Skyfire and Ramjet.
