IESB.com has posted the second half of their interview with writers Robert Orci and Alex Kurtzman. While the majority of the interview is directed towards their new movie, Eagle Eye, IESB does manage to toss in a few Questions on the Transformers sequel. Orci says that more of the Transformers mythology will make it into this movie--more about the Transformers history, and where they come from. And for those sticklers out there, they say that for the most part, it will be true to the Transformers gospel!
