Yesterday, scans from the latest issue of the Figure Ou Japanese hobby magazine gave us a look at Alternity Convoy's SynchroTech features. Now come even more scans from the issue showing off new images of HenKei Galvatron and Ironhide, Exile Music Label Convoy and concept sketches for 25th Anniversary Cheetor and Cyclonus. That's right! Our first good look at how Cheetor is supposed to transform (except maybe the cheetah head on the robot's shoulder), and our first look at Nightstick's robot mode!
