The Official Collector's Club Roundtable panel just wrapped up, and we now have information regarding some of the future pans for the fan club's exclusive toy offerings. The first is the big one: Punch/Counterpunch, a redeco of Universe Sideswipe/Sunstreaker with a brand new headsculpt. So now everyone can have an updated version of Cybertron's best-known double agent.

Additionally, Shattered Glass Omega Doom, as seen in the most recent club comic (a Cybertron Menasor with Omega Supreme's head) is not in the plans. Go be sad, everyone.
