Reprolabels.com has added a few new sticker sets to upgrade your toys! The first, and most awesome, is an upgrade set for the Blue Alternity Megatron - making him Beast Wars themed, complete with Predacon symbols, a rubber ducky bumper sticker, and a 'Yesssss' license plate! See it here! Then check out Animated Blurr (comes with stickers to turn a game die into a crushed Blurr cube!), Classics Prime G3 trailer , as well as the BTS version , and a set of silver Autobot and Decepticon symbols!
