Frenzy_Rumble's gotten his hands on the Blu-Ray of astf, and while searching through the special features, he made a discovery. A scale chart of ROTF Transformers (including the Fallen, Demolishor, Ransack (!) and Earth mode Soundwave) includes a grayed out design for something labeled 'The Plague.' It says no vehicle form, but mentions a combined form. Who could this be? The legion of Decepticon Protoforms perhaps? Or a new figure we have yet to see? Scope out the image here!
