

Hasbro White Demolisher?

Contributed by NightViper
Friday, 16 October 2009

New images of the white version of astf Voyager Class Demolisher are out, but this one is...different. Among the various plastic color changes, the most notable difference is the black treads seen in the Takara Tomy images have been replaced with brown, and a most of the painted details are different in layout or color. So is this leaked sample a Hasbro toy then? Or is it merely the difference between the Takara Tomy promotional image and the final toy?
