TFormers has some new Hasbro stock photos of upcoming astf figures. These figures include a Voyager Optimus Prime (the gray redeco from weeks ago), a black and silver Leader Megatron redeco, a Deluxe Sideswipe & Preview Bumblebee redecos, and a number of color images of upcoming Legends figures including Jolt, Arcee, and Stealth Bumblebee (which is similar to the DVD exclusive version in Japan).

You can view the images here and discuss them in Octoberus Prime's thread.
