Heads up for the toy collectors on two knock offs. First up, G1 Sunstreaker who's hitting the market around November. The differences from the vintage version include: missing factory applied black stickers, missing black "skirt" detail and black "triangle" detail on the side of the car, and a black triangle on the car's hood. On astf Sideswipe, the differences on the KO range from brighter silver paint, the blue windows aren't as translucent, and different detailing on the "hubcaps".

Head over to [TFW2005](#) regarding Sunstreaker and [KO Toys](#) regarding Sideswipe.
