

## Device Label Ravage and Tigatron Released Plus USB Features!

Contributed by Powered Convoy  
Friday, 23 October 2009

With Device Label Jaguar (Ravage) and Tigatron now shipping, reports are starting to come in on some of their USB device features. Seibertron.com is reporting on some of the features.

When the thumb drive is plug into the computer, a set up page will appear.

We can set up the characteristics of Tigatron/Jaguar (that eventually will appear on the Desktop) such as lazy or active, slower or faster speed etc.

We also can set the Tigatron/Jaguar to "eat up" the Desktop icons, "jumping" around, roar or even transform.

[Click here](#) to view more about these features, and discuss their release on our forums.
