Couple new toy photos surfaced today! First up, we've got a look at Voyager Nebular Starscream, revealed to be a K-Mart exclusive! His bio claims the tatoos aren't just for show! See them here! Then, Entertainment Earth brings us some official pictures of the NEST two-pack, featuring 'Battlefield Bumblebee' and 'Infiltration Soundwave'. This set also has a NEST sew-on patch... and an exclusive figure offer? Could we have a return of mail-away figures coming? See the image here, and discuss it here!
