The Decepticons are getting another German! The-Arker.com has posted a small gallery of an upcoming astf repaint for the Scout Class Ransack mold. The biplane will now be painted red, white and black; an homage to WWI German ace, the Red Baron! But not to be outdone, the Autobots have their own repaint on its way. Vansch of the 2005 Boards has posted an image of the Scout Dune Runner mold painted as G1 Autobot Beachcomber!
