CHOGOKIN APOLLO 11 & SATURN V REPLICA

This exquisitely accurate 1/144-scale reproduction is based on many specialized documents and other data. In addition, during development of this product, Bandai sought and received the full cooperation of the web site "Apollo Maniacs," a favorite of Apollo fans, in making sure that the overall appearance, as well as that of the parts such as the rocket and engine, is as accurate and detailed as possible. All the stages of the rocket, from take-off to splashdown, are reproduced. Just like the real thing, the rocket splits into nine sections, so that you can recreate all stages, including launch, the moon landing, and touchdown! The Saturn V rocket can be split into the first, second and third stages, and the Apollo 11 and lunar module can be joined to or separated from the rocket.
