

G1 Colored Legends Devastator Coming to Japan

Contributed by Powered Convoy
Friday, 06 November 2009

The EZ Collection (Legends) Devastator produced for their Revenge of the Fallen line is getting a make over in G1 colors. TakaraTomy is releasing the 7 Constructicons in the familiar green and purple in March of 2010. No words yet if these will be single packed like the original EZ Collection versions, or in a gift set similar to the Hasbro release of the original version.
